

LAB SETUP ASSIGNMENT

By: Muhammad Usman Arshad

30 MARCH 2026

Cisco Packet Tracer setup

Cisco Packet Tracer is a powerful network simulation tool freely available to Cisco Networking Academy members. This guide will walk you through the entire process of getting it installed and set up on your computer.

Step 1: Create a Cisco Account and Download the Cisco Packet Tracer

- <https://www.netacad.com/>
- Click on login button at top right corner

- Click on Sign Up button and create your account then return to this page and login to your account.

- For downloading Cisco Packet Tracer select this Free course “Getting Started Cisco Packet Tracer”

- In this Course in first module use the above-mentioned link to find the Cisco Resources page from where we will download the Cisco Packet Tracer
- <https://www.netacad.com/resources/lab-downloads>

Learning Resources

Cisco Packet Tracer

Cisco Packet Tracer, an innovative network configuration simulation tool, helps you hone your networking configuration skills from your desktop. Use Packet Tracer to experiment while building, managing & securing infrastructures.

To obtain and install your copy of Cisco Packet Tracer, please follow these simple steps:

Step 1.Download the version of Packet Tracer you require.

[Packet Tracer 9.0.0 MacOS 64bit](#)
[Packet Tracer 9.0.0 Ubuntu 64bit](#)
[Packet Tracer 9.0.0 Windows 64bit](#) ← Download from here for Windows or for Linux and Mac from above links

Step 2.Launch the Packet Tracer install program.

Step 3.Launch Cisco Packet Tracer by selecting the appropriate icon.

Step 4.When prompted, click on Skills For All green button to authenticate.

Step 5.Cisco Packet Tracer will launch and you are ready to explore its features.

If you need more guidance, please follow the [Cisco Packet Tracer Download and Installation Instructions](#).

System Requirements:
Computer with either Windows (10, 11), MacOS (12 or newer) or Ubuntu (22.04, 24.04) LTS operating system, amd64(x86-64) CPU, 4 GB of free RAM, 1.4 GB of free disk space

- From here download the Cisco Packet Tracer according to your Operating system.

- Successfully downloaded the Cisco Packet Tracer for Windows.

Step 2: Install the Cisco Packet Tracer Application

In different operating systems the installation process slightly varies. For Window its simple and described below.

- Accept the License agreement and click “Next”.

- Select your installation destination and hit “Next”.

- Simply it creates start menu folder, hit “Next”.

- If you want to create a Desktop Icon of Cisco Packet Tracer then mark it and hit “Next” and it will complete the installation.

- Search it on start menu, here is the Cisco Packet Tracer. Click Enter to open it.

- It will display login button, click it and login using your credentials and here it is ready to create networks.
